SKILLS

- JavaScript
- Ruby
- Rails
- React/Redux
- HTML/CSS
- Java
- C#
- OpenGL/WebGL
- Git
- Matlab
- SQL
- C++

EDUCATION

HOBART COLLEGE
B.S. Computer Science
B.S. Physics

2012 – 2017

WORK EXPERIENCE

JUNIOR ENGINEER INTERN

Summer 2015 & Summer 2016

City State Entertainment, Fairfax, VA

- Design WebAPI for in office use to easily retrieve game statistics |C#|
- Develop website that used that API to display information on TV's |HTML, CSS|
- Implement undo and redo in their 3D building system |C++|
- Engineer mapping tool to convert the 3D world into a 2D representation |C#|

WEB DEVELOPMENT INTERN

Summer 2014

Lerentech Solutions, Syracuse, NY

- Use SEO to increase customers website traffic |HTML|
- Work directly with customers to implement new features |HTML|
- Manage schedule to allow myself to meet deadlines

TECHNICAL EXPERIENCE

WEBGL WAVE SIMULATION

An interactive 3D wave simulation

|HTML, Vanilla JavaScript, WebGL, and GLSL|

Live - <https://gtongue.github.io/WebGLWater/>

Github - <https://github.com/gtongue/WebGLWater>

- Program simulation that renders waves in 3D using modern WebGL
- Write vertex shader to calculate the waves efficiently on the GPU
- Use the perlin noise function to calculate what the vertex height should be
- Design a UI allowing users to change amplitude, wavelength, velocity, and color

PROGRAMMING 200

A fullstack application designed to teach beginners programming

|Ruby, Rails, React, Redux, SQL|

Live - <http://www.programming200.com>

Github - <https://github.com/gtongue/Programming101>

- Program backend WebAPI to store user information and host website
- Design database schema to allow for efficient data access using SQL
- Engineer a system to run user inputted JavaScript with error handling
- Create a working console so users can debug their code using console log
- Write a testing library in order to see if users have completed the challenges

CS ASSISTED TRADING

Software used to assist in market research and develop trading strategies

|Java, JavaFX, Tradestation EPL|

Github - <https://github.com/gtongue/StockTool>

- Acquire data through API requests and parsing HTML pages
- Use data analysis to compile data in excel sheets
- Develop trading algorithms based on data in Tradestation's EPL
- Manage brokerage account and actively trade based on results
- Present findings at Hobart and William Smith Senior Symposium
